Local Grower Wins Many Awards at 'Hat Floral Show

Mrs. Maillard, Wins Five First And Five Second Prizes

Once more Redcliff citizens have reason to be proud of the achievements of one of their number in the person of Mrs. Agnes Maillard, for many years a Redcliff resident.

At the Medicine Hat Horticultural Exhibition held in the Arena in that city last Friday and Saturday, Mrs. Maillard entered ten exhibits and brought home no fewer than ten ribbons, one for every entry. Of these five represented First and five Second prizes.

This is the first time Mrs. Maillard has made any entries at the Medicine Hat Flower Show, but doubtless it will not be the last.

For many years Mrs. Maillard has been an enthusiastic lover and grower of flowers. She not only raises a great variety of annuals and perennials in her open garden but specializes in gladioli, dahlias and other plants which she raises in her cotton enclosed green house.

Mrs. Maillard even originates new plants which are indeed lovely specimens. Many of her cut flowers have been sent as far west as Revelstoke and as far east as Regina.

Her success as a grower of beautiful flowers is due in large part to her unceasing labor over many months of the year and also to her native love for flowers inherited doubtless from her father, Mr. A. B. Oakland, who every year, produces a beauty spot in Redcliff which gladdens the eye of every passer-by.

Mrs. Maillard has not only won honors for herself but has put Redcliff on the map horticulturally and her fellow citizens are proud of her.

The following is a list of the prizes won by Mrs. Maillard—

In the Amateur Collection of Cut Flowers Class—First prize for Pansies and Second Prize for Perennial Phlox.

In the Gladioli Section, Novice Class—First for White, Yellow, Collection of three varieties, and for Vase of Mixed Colors, and Second Prize for Pink and Purple.

In the Open Class—Second for Blue Gladioli.

In the Basket and Vase Class—First for Gladioli Type.

Recreation and Health As in Canada Today

Number 2 of a Series of Articles To Appear in the Review

Gymnastic exercises during the last twenty years in particular, have been subject to many changes, from the old military style. Formerly gymnastics consisted of positions which were maintained and corrected until a new one was taken. These static positions had their value but they were not functionally beneficial. What is active for in gymnastics is not static positions but graceful movements. We are indebted to one great authority in this respect, namely Niels Bukh of Ollerup, Denmark. It was he who first took the old Swedish system evolved under Mr. Ling and made of it a method more applicable to our daily life and made the movements more functionally beneficial. To attain this objective of his, he endeavored first of all to be strong and supple, to make the body an instrument—limbs and tendons of the body flexible so that the movements could be executed in a graceful, flowing manner, so that the chest could be a flexible strong protection for the heart and lungs and not a hindrance, like a corset, in their functioning.

Exercises are invented to take the place of natural exercises—e.g., a runner's legs may be trained by Fundamental Gymnastics in the gymnasium.

Fundamental Gymnastics are so blended and dependent on what has been given before and what is to come, that they cannot be divided into their various parts without at least changing the character of the exercises. The exercises are continuous, done rhythmically, the swing of one exercise being used as the beginning of the next. The rhythmic continuity of the exercise emphasizes the organic effects.

Changing the work from one part of the body to the other, of different exercises to work the same muscles; e.g. between strength, agility and flexibility. Fundamental Gymnastics are a continuous activity without

No More Homesteading In Province of Alberta

According to the 1939 Lands Act Effective Since August 2...

The era of homesteading in Alberta is gone, provisions of the 1939 Lands Act having gone into effect on August 2nd. From this time on, settlers will lease government lands for a term of 20 years, which is renewable for another twenty years. No rent will be paid for the three years immediately following the granting of a lease. Thereafter there will be payable one-eighth of the crops grown, with the exception of years in which the average yield is less than five bushels to the acre. The government will pay one half of the money received to the municipality in which the land is situated, and the municipality will pro-rate the money among the various taxing authorities. Any person who does not own land, who is 18 or over and a British subject or intending to become one may apply for a lease at a fee of \$5.

Social Credit Meeting Held Tuesday Evening

Speakers were A. J. Mitchell M.P. and Dr. J. L. Robinson M.L.A.

The Social Credit meeting held in the I. O. O. F. Hall here on Tuesday evening was fairly well attended.

Mr. Harry Johnson acted as chairman and introduced the speakers, Mr. A. J. Mitchell M.P. and Dr. J. L. Robinson, M.L.A.

Mr. C. Evans opened the radio and the audience listened to a broadcast by Premier Aberhart and some of his colleagues who carried on a dialogue with the object of showing the public how much his supporters rely upon and trust the Premier and his government.

During the evening Miss May Martin favored the audience with a vocal solo which was

rigidity or tension. They develop every part of the body. The manner in which it is taught gives to the pupil a satisfaction of achievement.

Many Visitors Here Go Through Glass Plant

186. Visitors. Passed. Through From August 1st. to 15th

During the two weeks, from the 1st to the 15th of this month 186 visitors passed through the Dominion Glass Co's factory here. Among the number we noticed the following: A wedding party of 19, Mr. and Mrs. E. J. Bren of Neelath, Sask., P. E. Palster, Regina, J. H. Pearson, Edmonton, D. J. Fleming, Toronto, Dave Kay, Winnipeg, Mr. and Mrs. L. Wilson, Calgary, A. Mc Coy, Stoney Plain, Alta., Victor Jacobson, Brock, Sask., Mr. and Mrs. Sutherland, Mill River, E. J. Stevens, Geo. Bean, V. Stevens and Edith McEachern all of Maple Creek, Mr. and Mrs. H. Adams, Kokomo, Indiana, U.S.A., Mr. and Mrs. J. R. Adams, Shirley, Indiana, I. McIntyre, Turner Valley, Mr. and Mrs. Nelson, Cranbrook, Mrs. Ed. Rudd, Vancouver, W. A. Kijath, Grand Prairie, Mr. and Mrs. H. S. Nelson, San Pedro, Calif., Mr. and Mrs. A. Aman, Meta and Vienna of Freeman, S. Dakota, Mr. and Mrs. J. Syce, Toronto, Mr. and Mrs. O. Soberv and Everett of Chicago, Ill.

oughly enjoyed and demanded an encore and Miss Betty Balmer entertained them with a dance which was very nicely executed.

At the close of the meeting refreshments were served and a pleasant social time enjoyed.

OBITUARY

It is our painful duty to record the sudden passing of Mrs. Alex. Maskell at the Medicine Hat hospital early this morning.

Mrs. Maskell had been ailing for some time but the news of her death came as a great shock to her friends in this community.

Mrs. Maskell has been a resident of Redcliff for more than twenty years. She leaves to mourn her loss, her husband and three children, Miss Mary at home, Ted and Mrs. B. McEachern, all of whom reside in Redcliff. The sympathy of the whole community goes out to Mr. Maskell and his family in their sad bereavement.

Synopsis of By-Law No. 224 of Town of Redcliff

To be Voted. Upon by the Proprietary Electors on Monday the 11th Day of September Ad. 1939

A BY-LAW has been introduced by the Council of the Town of Redcliff for the purpose of authorizing the Mayor and Secretary Treasurer to execute on behalf of the said Town an Agreement between the Municipal Corporation of the City of Medicine Hat, Alberta referred to as the Supply Authority of the First Part and the Town of Redcliff of the Second Part which agreement forms part of the said BY-LAW and may be inspected by any person entitled to vote thereon at the office of the Secretary Treasurer, Third Street, Redcliff, Alta. The said agreement recites that the Canadian Western Power and Fuel Company Limited have not complied with the written notice by the Town to the said Company to construct an Electric Lighting or Power Plant for the supply of electricity to the town inhabitants and the Town may enter into an agreement with any other person, firm or corporation to do so.

The Agreement grants the City of Medicine Hat exclusive rights to supply inhabitants of Redcliff with electricity for a period of ten years at the following rates and provides for a 24 hours continuous daily service in Single Phase Alternating Current at potentials of 2300—220—110 volts.

CLASS "A" 110 volt A. C. 1 phase service. First 20 k.w.h. @ 10c per k.w.h. Next 60 k.w.h. @ 5c per k.w.h. Over 80 k.w.h. @ 3c per k.w.h. Minimum charge—\$2 per mo.

CLASS "B" General purpose power, continuous A. C. 1 phase—220 volt service not to exceed five H. P. First 200 k.w.h. @ 2c per k.w.h. Next 200 k.w.h. @ 3c per k.w.h. Over 1000 k.w.h. @ 2c per k.w.h. Minimum charge—\$1 per rated H. P. per month. No account rendered for less than 3 H. P.

CLASS "C" Industrial Power continuous A. C. 3 phase 220 volts service up to 200 Horse Power. First 300 k.w.h. @ 4c per k.w.h. Next 700 k.w.h. @ 3c per k.w.h. Over 1000 k.w.h. @ 2c per k.w.h. Minimum charge—\$1 per rated H. P. for the first 50 H. P. and 75 cents per rated H. P. for all in addition.

Privilege of three phase extension shall be at the discretion of the Supply Authority. Large Industrial power by application and agreement. Supply Authority not bound to erect said electrical works until 50 consumers have signified their intention of becoming consumers by completion of the wiring details on their property.

A deposit of \$5.00 to be first made by installing consumers. Accounts to be rendered monthly and if same are outstanding after 30 days from time of rendering the service shall be subject in such case to discontinuance without notice. Supply authority not to be obliged to construct or erect extensions for a service of at least five regular applications for electricity service for each 1000 feet of single phase secondary

Town Council Held Regular Meeting Monday Aug 14

First Reading of BY-LAW For Supply of Electricity

The regular meeting of the Town Council was held on Monday evening, August 14th, with Mayor Sangster and Councillors Hitchen, Bushbain, Evans, Shaw and Hope present.

A sale price was set on two properties owned by the town, situated in the central and north Broadway portion of the town.

Two applications for the consolidation of tax arrears were received and granted.

Councillor W. R. Willis tender of his resignation from the Council was accepted and the Secretary was instructed to forward a letter of appreciation of his services while a member, to Mr. Willis.

A by-law providing for the supply of electricity to the Town from the City of Medicine Hat and a voting date thereon by the proprietary electors received a first reading.

The application of Jacob Hahn for a license to run a billiard room was granted.

Councillor J. Hitchen was appointed Deputy Mayor for the last quarter of the current term.

The accounts passed by the Finance Committee were approved for payment.

The Secretary's request for holidays was granted, Mr. Jno. Hitchen to act in the capacity of Secretary during Mr. Britt's absence.

circuit required to be constructed. Nothing in the agreement to prevent any firm, person or corporation from generating electricity for his, her, their or its own exclusive use. Wiring details subject to inspection and approval of supply authority.

Town not to be liable for delinquency rates.

Supply authority to pay taxes on its regular distribution system within the town's jurisdiction based on regular value for assessment purposes and regular will rate. Any sums due to the town for taxes shall be accepted by the town in the form of electrical energy for street lighting and the like, at three cents per K. W. H. for metered energy and 12 cents per rated Watt hour per year for all flat energy.

The agreement and all questions regarding rates to be charged for electricity and relating to the distribution thereof shall be subject at all times to the regulation and determination of the Board of Public Utility Commissioners for Alberta.

NOTICE

I, Frank Baird of the Town of Redcliff in the Province of Alberta, Returning Officer here by certify.

That the foregoing is a true synopsis of a proposed BY-LAW which has been introduced by the Town of Redcliff and which will be finally passed within four weeks after the assent of the proprietary electors there.

Life Begins At Forty

"Do you know that if you are a resident of Canada or the United States you got your last year of life absolutely free? That is to say, at the end of 1938 you just say as many years left to live as you had at the end of 1937."

The foregoing rather startling statement appears in a recent issue of Toronto Saturday Night as an editorial prelude to an article by Dr. E. Clark Noble, M.A., M.B., M.R.C.P., Medical Referee of the National Life Insurance Company with headquarters in Toronto.

The article in question deals with the extraordinary advances made in medical science in the past few years, showing such a remarkable acceleration recently that medical science was able, during the twelve months of 1938, to give a donation to humanity on this continent another full year of life expectation.

The announcement, if founded upon unquestioned statistical data and if the statistics have not been misconstrued, as statistics sometimes are, opens up a great vista of speculation. For instance, one is inclined to say whether this means, provided discoveries in the realm of medical science continue to advance in geometric progression, as they undoubtedly have done in the past two or three decades, that the time is rapidly approaching when human life can be extended indefinitely. Certainly, if the progress of 1938, as construed by the editorial note, is maintained and exceeded, it is to be assumed that at the end of every year hereafter, the life span of the extended another full year? If so, it can only be translated as medical progress to infinity.

On the other hand, does it mean that the saturation point in medical progress has been reached, and that hereafter there will be a slowing down in the life-saving process through new discoveries in the field of medical science and their application to disease and death. Apparently not, if Dr. Clark Noble, in his prophetic moments is correct in his conclusion, his treatise on the progress of the past few years with the comforting statement that: "We may face the future with confidence that our span of life will be still further increased as years go by."

More Disease Protests

In his analytical article on longevity on this continent in the past 30 years, Dr. Clark Noble states that "This increase amounts to approximately nine years in the case of male lives and 12 years in female, the expectancy of life at birth having risen from 46 in the year 1908 to 61½ in the former instance, and from 53 years to 68 in the latter. The increase has been fairly gradual until the past 12 months when it has shown the remarkable increase of one full year."

Prior to 1938 some authorities on the subject have been wont to point out that increases in longevity have been largely due to the savings which have been effected in infant mortality as a result of improved sanitation conditions and the preventive work of public health officials and have pointed to alarming increases in recent years in the death rates attributable to diseases of the elderly and more particularly cancer and heart disease, their contention being that these diseases are more prevalent than they used to be and give such reasons as life at high tension in the present age as causes.

While this is undoubtedly true to some extent, it is because more people today are living to an older age than heretofore. In other words, a greater percentage of the population today has reached the age where they become susceptible to such diseases. This, at any rate, is the conclusion reached by Dr. Clark Noble, explaining his theory in the following words:

"During the 30 years prior to 1938, the decrease in the death rate among white adults amounts to, roughly, 40 per cent, falling between the extremes of 80 per cent at the low ages (1 to 10 years) to 10 per cent at the high ages (80 to 74). It will be noted that the decrease involves all ages but is greater in the lower age bracket with the result that the general population is aging. As a result, we observe an apparent increase in the death rate from the diseases which take their toll in later life, particularly cancer, and degenerative diseases of the heart, arteries and kidneys."

Hope For The Elderly

If these percentages are acceptable, and there appears to be no reason why they should not be regarded as correct, they demonstrate very clearly that while the savings in life in the early years has been tremendous, on the other hand the more moderate savings in the later years of the human life span warrants Dr. Noble's use of the term "apparent" when applied to the increase in the death rate among the elderly. It is not a real increase in death rate from the diseases which take their toll in later life, particularly cancer, and degenerative diseases of the heart, arteries and kidneys.

But even here, it should be noted, there has been a conservation of longevity among the elderly as a result of medical research and discoveries, the recent discovery of the value of sulphathiazole in the treatment of pneumonia being one of the latest.

So much has been done to increase the life expectancy of the infant and the young child, that it is reasonable to suppose that any further conservation of life which may ensue in the near future will increase the life expectancy of those who have reached middle age and beyond, and it is probable that "Life begins at Forty" will become literally a truism.

Priceless Treasures

U.S. Army Air Base

Grave Of An Anglo-Saxon King
Yields Riches

The Daily Mail reported priceless treasures in gold and silver were dug up from the grave of an Anglo-Saxon king near Ipswich, Suffolk.

Reaching the heart of the treasury after nearly a year's excavation, the paper said, the archaeologists used their hands to prevent damage as they removed the last relic of the jeweled assemblage, a gold buckle carved in barbaric fashion, a massive gold belt encrusted with precious stones, a solid silver bowl 10 inches in diameter, and three rings and six bracelets covered with rubies and emeralds.

The objects will be sent to the British Museum, where they will be cleaned by experts.

Have Their Own Language

Crows folk have a language all their own. To them, a hump, a hump, elephants are bulls, monkeys are old folks, hippos are hogs, hyenas are grave-diggers, and witch and big turkeys. People who take in all the free sights but never buy tickets are lot-fishes to them.

A new animal, officially named *shortie*, has been found in Wyoming.

A Synthetic Age

The Marvelous Science That Science Has Made

If Henry W. Longfellow, well over half a century ago, could have uttered his words that "Things are not what they seem," do it, too, without surprising the customers at large—have his poetic announcements accepted for the fact it was, then the curious wistful mind would wonder what was his verbal riddle, confronted by the present masquerade of men, manners, and matters that, in fact, the world as it keeps on turning.

Shakespeare dealt with the question of appearance as a bit differently. His pronouncement was that "All that glitters is not gold." And in this irrelevant age the answer may well be "Who cares?" Today it is a popular theory that all is well that looks well. Even when not put into words it seems to have gained the assent of followers. And that does not make them blameless. As long as we do not put our lives in our neighbors' preserves any individual has a right to form an opinion and stick to it, that is provided he does not live in a free country where ideas are not regulated, and the governed still have a voice in government.

There is a fear of a label, may well be called a synthetic age. Time was when a salesman's persuasive "Just as good" meant caveat emptor to the person on the purchasing end of a transaction. But not necessarily any more. The buyer expects substitutes and marvels at the strides science has made—knows that original sources of many commodities have changed because of the magic of chemistry. Manufactured pearls, silk, synthetic rubber, synthetic leather, textiles created from milk, glass wood, and many other unlikely things are already accepted without surprise.

Longfellow was right. "Things are not what they seem." Very often they are what he better. In the history of today the chemical may replace the great hand who dwelt by the Avon, and may make a "synthetic" one not, however, so well as a word but to be conquered by the great knowledge of the science—Ottawa, Journal.

Has Become Commonplace

Crossing Ocean By Air No Longer
Balanced Risk

Where the pioneers of only a dozen years ago created the "big news" of the day on the air roads of the North Atlantic, the great four-engine Clippers of Pan American Airways fly to-day with the regularity of a metronome, the safety of a ferryboat. The Atlantic crossing, scoffed at dream of the men of yore, who believed the Wrights, and goal of scores of intrepid pilots on the Lindbergh trail has become almost a commonplace.

In the presence of a little knot of onlookers for the most part relatives and friends of passengers, the Yankee Clipper takes off, the Atlantic Clipper lands, the Dixie Clipper wings away—beginning or completing journeys that span 4,000 miles of sea in little more than twice around the clock. With characteristic quiet assurance and yet with the marvel of the machine age, the American public already takes Atlantic flying as schedule in the stride.

Equally in character is the prompt way in which travelers take advantage of the new speed which has been made available on a crash of emergency, business and pleasure.

As father reaches the bedside of his son, gravely ill in Florence, two days out of New York. A group of publishers has an opportunity to feel the pulse of Great Britain through personal interviews with the Prime Minister and other statesmen and yet be back at work within a week. Already quota immigrants have reached America by air.

A fashion editor takes off on Wednesday to be present at an opening in Paris on Monday, with plenty of time to spare. The Bureau of Entomology and Plant Quarantine releases in big time a box of 100 Mexican florals, a parasite with which it is experimenting. A business man flies over to Europe and back in six days to guide the week-end with his wife at Cannes. Travelers ranging in age from 14 to 90 casually make the crossing. Entering their journeys by air, those who leave on Saturday, for example, can be in any major capital by Monday; can reach Cairo by Thursday, Calcutta by Friday, a week from take-off. If they wish, they may circle the world in eighteen days. With the forging of the Atlantic link the old earth once more has been marvellously shrunken.

New York Times.

Distribution Of Trees

Since the Dominion Forest Nurseries Stations were established at Indian Head, Saskatchewan, in 1901, about 160,000 trees have been supplied to nearly 60,000 farmers in the three Prairie Provinces. Since 1935, over 6,000,000 trees have been distributed under the Prairie Farm Rehabilitation programme in the drought area.

To encourage the domestic production of wheat a government board has been authorized to control and limit the importation of wheat and wheat flour into Canada.

A cutworm is the caterpillar stage of a night-flying moth.

Lengthen Life Span

Chemists Report The Effect Of A
Balanced Diet

Reactive simple diet improvements can postpone the onset of old age and lengthen the life span, Dr. H. C. Sherman, Dr. H. C. Chang, and the Columbia University chemistry department told the Pacific Science Congress.

They reported repeated successes in experiments on white rats. They made no reference to the possible effect on humans but said the diet is "probably as good nutritionally as any or most American diets."

Two methods were used. In one they added extra protein, minerals and vitamins, or all three, to the regular staple food. In the other they added no outside substance but simply varied the proportion of the various staple food articles in the diet.

The changes were so arranged as to keep blood growth and development on the animal "symmetrical"; that is, these two phases of life progress were kept in step. This prevented the accumulation of excess fat and kept the rate of growth down sufficiently to prevent any lessening of vitality.

Animals thus treated, they said, attained materially narrower earlier than normal, but a longer period of adult vitality and reached senility later.

New Zealand Ready

Has Issued War Book Detailing Plans
For Emergency

Announcement of a "New Zealand Government War Book," detailing plans for an emergency, has been made by Prime Minister Savage.

The book is the result of 400 committee meetings and the co-operation of 40 government departments. Most of its chapters will remain secret until an emergency.

Mr. Savage revealed the main headings: Emergency legislation; mobilization; medical examination of recruits; guards for vital points; overseas passenger traffic; control of navigation aids; coast watching; use of alien; trading with the enemy; broadcasting; overseas telegraphic correspondence; priority of printing; accommodation for extra troops.

The book provides instructions to members of the various emergency services for action: first, when there is a threat of war; secondly, "during a protracted period when war appears to be probable"; and, thirdly, when war has broken out.

A comprehensive organization for supply is outlined, involving action by 24 departments and providing for foodstuffs control, medical and oil supplies and overseas trade.

Land Area Of West

The total land-area of the three Prairie Provinces is 652,180,720 acres of which the area seriously affected by drought in recent years amounts to 103,300,000 acres or 15.8 per cent. In the drought area there is a population of 815,106 in the rural areas, 702,696 living on 171,623 farms.

Two Hundred Thousand Without
Country May Strengthen Army
Of France

France, haven for "men without a country," at last has opened her official eyes to see the potential army of between 200,000 and 300,000 fighting men living within her borders.

More than 150,000 Spaniards of fighting age, most of whom are hard-earned anti-Fascist veterans of Spain's civil war, are in French camps.

Thousands of anti-Nazi German soldiers across the frontier into France since the war began in French camps.

The first indication that the government might do something about these men who have frequently signified their desire to fight for France came last April.

Then 300 Spaniards signed up for the Foreign Legion. Tens of thousands of Spaniards applied for admission.

The next step was to make it possible for foreigners to promise that they would fight for France in the event of a German invasion.

Finally, the government ordered a "provisional census" of foreigners between the ages of 20 and 45 who are without nationality or were admitted to France as political refugees.

Canada moved up to fourth place in importance as a source of supply for imports into the Union of South Africa, displacing Japan, and coming after the United Kingdom, the United States, and Germany, in the order named.

Herr Goering, Nazi No. 2, has a specially designed uniform for each of his nine reasoning titles and a magazine for each. Many a battle is fought at the table.

Chemists of a large rubber company have developed a new plastic for coating paper to make it resistant to water, oil and many acids.

WHICH

In Redcliff Park
Gay flowers blow
In sweet profusion
Now on low

About the Pile
In memory raised
To those lost ones
So justly praised

For sacrifices
Made of yore
That bloody war
Should be no more

Have we kept faith
With those long gone,
By planting flowers
'Round a Stone?

They've been betrayed—
Each mother's son,
If bloody war
Again should come.

WAR OR PEACE

These are critical days for the world. Will there be war or peace? That is the question. Answering Poland's threat of war over Danzig, Germany is rushing preparations for invasion, according to the Lethbridge Herald.

Jablunka Pass, Slovakia's main highway to Poland has been closed to all but German military traffic. With the Nazi power lined up in northeast Germany and East Prussia, ready to cut off Poland's corridor to the sea, Germany is now actively seeking support of Yugoslavia and Hungary, which would give the Nazis a clear road into Poland from west and south. Reports indicate Hitler even may seize Hungary, the only state in the area not guaranteed by Britain and France.

Negotiations in Operation. For Hard Surfacing. Broadway -

We understand that Mayor Sangster and members of the Council are busy carrying on negotiations with the Provincial Government authorities, for the purpose of getting Broadway, from the Premier Brick Plant corner to First Street, hard surfaced when the equipment for doing the work on the Redcliff-Medicine Hat highway is available, as will be the case by the end of this week or the beginning of next.

This will meet with the approval of all the citizens of the town we feel sure, and high hopes are being entertained that the efforts of our Council will meet with success.

Electricity for Redcliff

A by-law, a copy of which appears in this issue, dealing with the supplying of electricity to Redcliff, by the City of Medicine Hat, is to be submitted to the ratepayers for their approval or disapproval on Sept. 11th. Before such a vote is taken it would seem to be a good idea if a public meeting of the ratepayers

should be called, at which those who know, would discuss the matter of electricity supply from its various angles, for the benefit of those who do not know.

It is practically inconceivable that there should be anyone in this age and generation who would not wish to have the conveniences available through a supply of electricity but it is only fair that consumers should have first hand information in regard to cost of wiring their properties etc. before their final decision on the matter is given.

CLOWN BRINGS HAPPINESS

An interesting item of news reached our office today from Mrs. A. McKinny of Bowell. She enclosed a clipping from the Calgary Herald in which was given an account of the visit of 3 clowns of the Ringling Bros. Circus, to the Junior Red Cross Hospital for Crippled Children in Calgary.

Mrs. McKinny's grandson, 5 year old Norman Johnson, son of Chester Johnson of Cowley, and formerly of Redcliff, who has been in the hospital for some time received a wonderful thrill when Felix Adler, one of the world's greatest clowns whispered in the little fellow's ear that the Doctor had telephoned him to tell Norman Johnson that the cast would be removed from his leg the next day.

What a happy little boy!! And what a charming clown!!!

Mr. John Fitzhenry, who has been visiting with his brother, Mr. G. W. Fitzhenry and Mrs. Fitzhenry for the past two weeks left on Monday for his home in Minneapolis, Minn.

The road gang have plished their tests on the vacant lots north of Broadway between 3rd and 4th Streets. Work on the hard surfacing of the Redcliff-Medicine Hat highway will be started at the end of this week or the beginning of next.

Law Holston's book "Other Gods" is now available at the Public Library at Medicine Hat. No doubt all Law's old friends will want to read it. We have much pleasure in recommending it to our readers after thoroughly enjoying it ourselves.

See "Man About Town" at the Monarch this weekend featuring Jack Benny and Dorothy Lamour and Edward Arnold.

They say "No news is good news." We don't agree with this. Please send or bring your news items to the Review Office and help us make a newsy newspaper.

(Continued from page 1.)

The vote of the said proprietary electors of the Town of Redcliff upon this by-law shall be taken on Monday the 11th day of September A. D. 1939 commencing at the hour of ten o'clock in the forenoon and continuing until the hour of seven o'clock in the afternoon, at the Town Hall, Third Street, Redcliff, Alberta.

Dated at Redcliff, in the Province of Alberta this 17th day of August A.D. 1939.

THE WOMAN WHO KNOWS ABOUT FISH

CREAMED FISH
Cover fish with white, bring to boiling point and simmer for a few minutes until fish is cooked - use top of cream or milk. Drain fish, small pieces on lettuce or top. Return to cream and top. Before serving add 1/2 cup cream or whole milk. Do not let cream remain too long or cream will curdle. Garnish with parsley.

She has solved the daily problem... because FISH offers a welcome and wholesome change at mealtime, something the whole family will like. There are over 40 different kinds of Canadian Fresh Fish and Shellfish from which you can choose, either fresh, frozen, smoked, dried, canned or pickled. All of them can be served in an infinite variety of ways. And... one of the good things about FISH is that it is so easy to cook, and so easy to prepare! Serve Fish to your family often.

WORLD HAPPENINGS
BRIEFLY TOLD

The Daily Mail reported precious treasures in gold and silver were dug up from the grave of an Anglo-Saxon king near Ipswich, Suffolk.

France gained 744 trained aviators for her air corps with the arrival of two groups of former Czecho-Slovak army fliers in Calais and Roubaix.

Scotsman Routledge, 78-year-old Australian explorer-author, died of a heart attack while visiting a London manufacturing firm.

Trans-Canada Air Lines carried 6,794 passengers in the first six months of the current year, it was announced in Montreal.

Pan-American Airways will file in Washington an application for authority to begin a fortnightly mail and passenger service between the United States west coast and New Zealand.

Indication that efforts will be made to retain Lord Tweeddale for a second term as governor-general of Canada was given by Prime Minister Mackenzie King.

July building contract awards throughout Canada, as compiled by Maclean, Building Reports Agency, totalled \$21,129,700, a gain of 4.5 per cent. over the total for July, 1938.

Hon. Norman Hapell announced 600 young Ontario men will be trained as aircraft mechanics by the Ontario department of labor at the request of the department of national defense.

A group of "teen-aged youngsters in the Calgary High club were announced as winners of the annual small bore rifle championship of Canada. Members of the team are believed to be one of the youngest ever to win the title.

U.S. Treasury Secretary Morgenthau announced he would make a special trip to Poland to thank that country for paying its war debt to the United States regularly. Morgenthau said the cash minister had invited him to go.

Prairie Broadcasting

New Station At Watrous, Sask., To Have Wide Coverage

A coverage greater than any station of its size, or even bigger, is claimed for the new Canadian Broadcasting Corporation's 50,000-watt transmitter, CBRK, at Watrous.

Because the station operates on a cleared channel, 540 k.c., in a choice position on the dial because it is based near mineralized salt lands, is without ground disturbances, and has ideal atmospheric conditions, engineers say it can be heard over most of the continent. It is anticipated that full-time coverage of the wide-spread ability will extend west and east from the Rocky Mountains to Port Williams; north to the Northwest Territories, and south to the United States. With favorable atmospheric conditions there is no reason CBRK could not be heard in the Arctic Circle. At any rate, it will be available to every radio listener in the prairie.

The site for the station was chosen by experts from the Department of Transport. The station is situated on a hillside, and the salt deposits around Watrous make it an ideal spot for a radio transmitter. Some experts believe the salt and the salt deposits will make this station one of the best in the world. It is the fourth of the 50,000-watt transmitting stations which will bring daily 16 hours of broadcast service of the best programs from the United States and other parts of the world, as well as Canada, to radio listeners of the Dominion.

Besides the Watrous and Saskatchewan plants, there are sister stations at Vancouver, Quebec, and Montreal, Ontario, erected last year and equipped with the most modern apparatus obtainable. All these stations were carefully chosen to provide a maximum coverage of the geographical area they were designed to service.

Find New Comet

Discovery of a new comet near the constellation of Taurus was announced by Harvard Observatory. The new body, found by a Belgian named Rignollet, was believed to be an amateur observer, was described in a message relayed to Harvard from the International Astronomical Bureau at Copacabana. It was said to be of approximately the eighth magnitude.

Forty-eight per cent. of the business and professional women in the United States have relatives whom they support, in whole or in part, by their earnings.

In his youthful days Napoleon lived chiefly on dry bread and wore shoes with pasteboard soles.

Nearly 400 types of chess now are produced in the United States.

To Build Factory For Victoria

Plane Flying Craft Covered With Plastic Material

Within a few months an aeroplane factory in Victoria, B.C., will be digging out flying craft covered with a new plastic material which will not rip nor tear even though rubbed by bullets, according to Morris E. Heiser of London and Los Angeles, Calif.

The engineer who originated in 1937 the Heiser-Benderson intended for use in Atlantic and Pacific oceans as floating landing fields and docks is making arrangements for location of a factory and test runway.

As soon as a factory has been built, he said, work will start on planes built for the plastic material patented by Anders Nicolay Andersen, a Norwegian, who received a patent in 1930 from the United States patent office. Heiser and Michael Andersen, a son of the inventor, now control the patent.

Heiser came from Glendale, Calif., where several plane manufacturing plants are located and from where he expects technical experience to join his factory staff to help in mass production of plastic-covered planes. Other experts will come from the Old Country, he said.

"I propose to build our own plant for training of Canadian youth to make and fly Canadian aeroplanes," Heiser said.

The basic materials for plastic aeroplane covering are available in large quantities in British Columbia, he said. Synthetic resin and certain oils needed can be produced without difficulty in the province.

"We propose to train youth in various branches of the factory. They will know how planes are made and how to handle plastic. Those who learn to fly, may when grounded through a minor accident, be able to repair any damage to the wings in 40 to 50 minutes."

Heiser said.

"I propose to build our own plant for training of Canadian youth to make and fly Canadian aeroplanes," Heiser said.

Systematic Entomology

New Insect Surveys Are Proving Of Value To Farmers

An important part of the Division of Entomology, Science Service, Dominion Department of Agriculture, is the section which has to do with the classification of insects, the study of their habits, their distribution, their life cycles, and the building up of a collection of specimens. This work is known as systematic entomology, and is directed by Dr. J. H. McDunnough under whose care is the national collection of insects.

In the national collection there are now well over 80,000 species. In the past ten years, as the result of insect faunal surveys, fully 1,000 new species have been discovered, described, and added to the national collection.

Insect faunal surveys are being made this year in various districts of the Dominion. One is being made for the first time in Prince Albert National Park, Saskatchewan, which is nearly 1,900 square miles in extent. Such parks are naturally rich in a splendid feeding and possible breeding area for an infinite variety of insects which may have an economic effect upon agricultural crops.

Another survey is being conducted in Southwestern Ontario to determine what insects are coming from that part of Canada from nearby areas of the United States. In Northwestern New Brunswick, Canada, in European beetles have been found. It is believed they originally came with the lumber in European ships loaded at New Brunswick ports. To what extent they have established themselves, this year's survey has been planned to determine.

Insect faunal surveys are exacting work, but without the knowledge gained from such surveys it is difficult to project effectively the work of control carried out by the economic entomologist.

Insect faunal surveys are exacting work, but without the knowledge gained from such surveys it is difficult to project effectively the work of control carried out by the economic entomologist.

SHIRTWAISTER HAS NOVEL IDEAS

By Anne Adams

War Veterans Place Plan Before Administrative Officers

A low-cost housing scheme applicable to war veterans was placed before several administrative officers of government departments by a small delegation of Memorial Hospital Building Society of the Imperial Veterans Association, J. Root, president of the organization, headed the delegation.

The party was made up of the war veterans assistance committee of the Dominion housing scheme and the British ministry of pensions. The veterans asked governmental assistance for construction of homes, under the auspices of the society, under a 30-year self-liquidating plan. The unit laid before the officials contemplated a six-room house built at an approximately cost of \$2,000.

One aspect of the proposed plan was that Labor employed should be exclusively war veteran labor, and this should be paid, where feasible, by credit to the veteran on the purchase price of a home. All veterans purchasing such homes would be required to pay a fixed part of the cost of his own labor.

Other features of the project included certain obligations on the home-owners, one of which denied them the right to sell, mortgage or hypothecate without consent of the society.

Other features of the project included certain obligations on the home-owners, one of which denied them the right to sell, mortgage or hypothecate without consent of the society.

By Dr. J. W. S. McCullough

GENERAL CARE OF THE EYES

Valuable suggestions on the care of the eyes are contributed to the summer number of "Health" by Dr. Clarence E. Hill, of Toronto, as follows:

In the daily routine of life, it is important to always remember to wash one's hands after touching handles, door knobs, push plates, etc., to avoid carrying infection to the eyes. Even shaking hands transmits germs from one person to the other.

Miss Melba Nolan, who has been spending her holidays in Calgary and U. S. points returned to town on Sunday.

The matter of a suitable building in which to conduct physical training classes here this coming winter, is now under consideration in several quarters.

Miss Eva Lien returned last Tuesday from a month's vacation at Portland, Oregon.

Mrs. W. Hill has as her house guest at present her sister, Mrs. Jeffery, of Regina.

Mrs. Ruthford Smith and three children of Vale are visiting at the home of Mrs. Smith's parents, Mr. and Mrs. R. N. Rose.

Mrs. J. Jacobson returned last week from Seattle where she has been spending a holiday with friends.

Miss Sarah Davies, of the Medicine Hat General Hospital staff was a visitor at her home here over the weekend.

Mrs. H. Kitchen and infant daughter arrived home on Tuesday from the Medicine Hat Maternity Hospital.

After visiting for the past month with her mother at Vancouver, Miss Eileen Lightfoot returned to town on Saturday.

Station... Officials... Proud... of Red-Meat Crabapple

Fruit grown at the Government Horticultural Station at Brooks is being offered for sale this week.

Several varieties of plums, crabapples, apples and sand cherries are available and a big turnover of these is expected.

A red-meat crabapple which jells readily is one fruit of which the Brooks Station officials are particularly proud.

WEDDING BELLS

--- HARRISON--- IRVINE ---

A wedding of interest to our

Redcliff readers took place in

Medicine Hat on Saturday Aug.

19th, when Miss Florence Eliza

beth Irvine, daughter of Mr. and

Mrs. A. D. Irvine and Mr. Truman

Harry "Pat" Harrison, son of

Mr. and Mrs. Wm. Harrison, both

of Medicine Hat were united in

the bonds of Holy wedlock by

the Rev. H. V. Ellison.

Mr. and Mrs. Harrison are

spending their honeymoon at

Banff and upon their return will

reside in Medicine Hat.

"Pat" Harrison is well and

favorably known here, having

been on the office staff of the

Dominion Glass Factory here for

the past several years. He is

also well known in baseball

circles, playing on the Redcliff

team for two seasons.

His friends in Redcliff wish

Mr. and Mrs. Harrison a long

and happy married life.

J. Miss Margaret Sellhorn, who has been holidaying at Minneapolis and other United States points, arrived home on Friday.

Oscar Johnson returned home Wednesday from Medicine Hat hospital where he had his tonsils removed on Tuesday.

Mrs. A. Duban left last week on an extended holiday with friends and relatives at St. Paul and Fairbault, Minn. and at Billings, Mont.

Mrs. H. Barchett is a visitor at Calgary this week. She was accompanied to the city by her niece, Miss Edith Lidgett of Eston, Sask.

Mrs. J. Komick and daughter Betty of Hesketh, Alta. are visiting with Mr. and Mrs. C. Newham and family. Mrs. Komick was a former resident of Redcliff.

Mr. Barney Brownlee who has been visiting here for the past week has secured a position on the Davidson farm west of town.

The British Columbia Government has ordered a reduction of three cents per gallon in wholesale gasoline prices, and fixed the price spread between whole sale and retail prices at 5 to 6 cents. Vancouver motorists now buy standard gasoline at 27 cents a gallon, including a seven cent provincial tax.
